

Create Binance Pay Withdrawal

🌟 Ask AI

POST <https://api.getorbital.io/crypto/withdrawal/binance> ...

Initiates crypto payout to a Binance Pay user using their Binance ID or email.

📖 You can verify your receiver's identity before creating creating a Binance Pay withdrawal

Body Params

INDIVIDUAL RECEIVER (PPDL - BINANCE PAY) ⌵

receiveType string enum **required** EMAIL

Specifies how the receiver is identified: either `BINANCE_ID` or `EMAIL`.

Allowed: EMAIL BINANCE_ID

receiver string **required**

The **Binance ID** or **email address** of the receiver, depending on the `receiveType` specified.

externalId uuid **required** 3a25935e-3030-

Unique ID for the transaction generated by the merchant. Each request requires a **new** externalId; reusing one is not allowed.

notifyUrl uri https://noti.fy

URL to receive notifications about the withdrawal status.

sourceCurrency string enum USD

This is the currency held in the **merchant's** balance from which the withdrawal amount will be deducted.

Accepted values: USD , GBP , EUR , USDT , USDC .

Allowed: USD GBP EUR USDT USDC

sourceAmount string 1000

The amount of `sourceCurrency` that the **merchant** wants to deduct from their balance.

targetCurrency string enum USDT

This is the cryptocurrency that the **receiver** will get in their Binance Pay wallet.

Accepted values: `USDT` or `USDC` .

Conversion Rules: If `targetCurrency` is specified, a conversion occurs. It can be:

- **Fiat-to-Crypto:** e.g., `USD` (source) to `USDT` (target).
- **Crypto-to-Crypto:** e.g., `USDT` (source) to `USDC` (target).

If `targetCurrency` is omitted, no conversion occurs, and the payout is made in the `sourceCurrency` .

Allowed: `USDT` `USDC`

targetAmount string

The amount of `targetCurrency` to be credited to the **receiver**.

100

cashierCurrency string enum

The currency in which the receiver's balance is displayed on the merchant platform.

EUR

+ Show 31 enum values

cashierAmount string

The amount in `cashierCurrency` that is displayed in the receiver's balance on the merchant platform.

500

firstName string **required** length ≤ 100

Receiver's first name.

JOHN

lastName string **required** length ≤ 100

Receiver's last name.

DOE

dateOfBirth date **required**

Receiver's date of birth in `YYYY-MM-DD` format.

1990-01-01

merchantId string

Internal merchant identifier - PMID number. By default, this field is automatically referenced by the system.

PM-012345

personType string enum Defaults to `naturalPerson`

Indicates the type of receiver. Can be `naturalPerson` or `legalPerson` .

naturalPerson

Allowed: `naturalPerson` `legalPerson`
